

EU Taxonomy for Sustainable Activities

Objectives

- Climate Change Mitigation
 - Renewable Energy
 - Energy Efficiency
 - Greenhouse Gas Emissions Reduction
- Climate Change Adaptation
 - Resilience Infrastructure
 - Climate Risk Management
 - Adaptation Measures
- Sustainable Use and Protection of Water and Marine Resources
 - Water Management
 - Marine Ecosystems Protection
 - Water Pollution Prevention
- Transition to a Circular Economy
 - Waste Reduction
 - Resource Efficiency
 - Recycling and Reuse
- Pollution Prevention and Control
 - Air Quality
 - Soil Quality
 - Waste Management
- Protection & Restoration of Biodiversity & Ecosystems
 - Habitat Conservation
 - Biodiversity Enhancement
 - Ecosystem Restoration

Economic Activities

- Agriculture, Forestry, and Fishing
 - Sustainable Farming Practices
 - Forestry Management
 - Sustainable Fishing
- Manufacturing
 - Green Manufacturing Processes
 - Sustainable Materials
 - Emission Control in Production
- Energy
 - Renewable Energy Sources
 - Energy Storage
 - Grid Infrastructure
- Water Supply, Sewerage, Waste Management, and Remediation
 - Water Treatment
 - Wastewater Management
 - Soil Remediation
- Transportation and Storage
 - Low-Emission Vehicles
 - Sustainable Logistics
 - Infrastructure Development
- Information and Communication
 - Green Data Centers
 - Sustainable ICT Products
 - Digital Solutions for Sustainability
- Financial and Insurance Activities
 - Green Bonds
 - Sustainable Investments
 - Environmental Risk Assessment
- Real Estate Activities
 - Green Buildings
 - Sustainable Construction
 - Energy-Efficient Retrofitting
- Professional, Scientific, and Technical Activities
 - Environmental Consulting
 - Sustainability Research
 - Green Technology Development
- Administrative and Support Service Activities
 - Sustainable Procurement
 - Green Office Management
 - Eco-friendly Business Services

Technical Screening Criteria

- Performance Thresholds
 - Sector-Specific Standards
 - Emission Limits
 - Efficiency Benchmarks
- Do No Significant Harm (DNSH) Criteria
 - Environmental Risk Assessments
 - Compliance Measures
 - Monitoring and Reporting
- Minimum Safeguards
 - Human Rights
 - Labor Standards
 - Anti-Corruption Measures

Transition Activities

- Climate Change Mitigation
 - Energy Transition Projects
 - Carbon Capture and Storage
 - Low-Carbon Technologies
- Climate Change Adaptation
 - Resilient Infrastructure Projects
 - Adaptation Technologies
 - Risk Assessment Services

Enabling Activities

- Supporting Other Sectors
 - Innovation in Green Technology
 - Consultancy and Advisory Services
 - Financial Support Mechanisms

Implementation

- Companies and Investors
 - Compliance with Taxonomy
 - Reporting and Disclosure
 - Investment Alignment
- Member States
 - National Legislation
 - Incentives and Penalties
 - Monitoring and Enforcement
- EU Institutions
 - Regulatory Framework
 - Guidance and Support
 - Policy Integration

Reporting Requirements

- Corporate Sustainability Reporting Directive (CSRD)
 - Extended Scope
 - Detailed Reporting Standards
 - Assurance Requirements
- Disclosure Requirements for Financial Market Participants
 - Sustainable Finance Disclosures
 - Transparency in Investment Products
 - Risk and Impact Assessments
